6	D	Triethanolamine	Triethanolamine	0.79
Total				100%
Procedure		Weigh all of phase A into glass beaker and heat to 45°C. Mix with propeller and continue mixing until all raws are dissolved and solution is homogenous. Add Phase B to A by mixing at high speed to ensure all raws are fully incorporated. No heat is necessary. Next add Phase C, pearlescent pigment, to Phase A & B using propeller mixing. Lastly, add phase D and mix with a propeller. Fill into desired components.
