Procedure	Premix Phase A in a glass beaker and heat to 70C. Using a propeller blade, stir until all ingredients are melted and a clear solution is formed. Slowly add Phase B into Phase A and mix until fully incorporated and a more viscous solution is apparent. Add color, Phase C, and mix until completely dispersed. Lower heat to 50C and as mixture thickens slightly, add phase D and slowly stir. Lastly, add Phase E, flavor, and mix thoroughly. Fill scrub into desired jars.
