6	B	Majestic Pink Grapefruit	Mica (CI 77019), Red No. 30 Lake (CI 73360)	17.00
Total				100%
Procedure		Weigh all of phase A into glass beaker and heat to 85°C. Mix with propeller and continue mixing until all raws are dissolved and solution is homogenous. Add phase B and mix rapidly until uniform. Once pigments are fully incorporated, mix slowly for 10 minutes to reduce air entrapment. Pour into desired molds, let solidify to room temperature and freeze for 10 minutes to enable easy release from molds.
